[How To Use]

1. Cleanse thoroughly to remove impurities.
 2. Triangle Peel PA or PB softens dead skin cells and provides gentle care for the skin. (3-5 minutes)
 3. After squeezing out the acne, apply MILD ALA or ALA-M solution.

 5. Rub the counteractive bubble clear and wipe it off with a sponge. (Neutralization)
 6. Light source irradiation: IPL or LED (10 to 30 minutes)
 7. Calm management (cryolab, cool modeling)
 8. Finishing (cell cream, sun block)
